

A global map of government, and the tools that run on it.

UnGovr maps each layer of government to the ground it serves, from national agencies to mosquito abatement districts, and builds the tools that put the map to work. Use our interfaces, or build your own on the same data.

UnGovr's goal is to accelerate transparency in government, and the trust that follows it, everywhere.

UnGovr Request Pilot

Report an issue once. Boundaries and service rules find the agency that owns it. Open today in California and Ireland.

30,000+ routing rules
1,100+ agencies routed

UI 311ca.org · sortitout.ie
API data.ungovr.org/v1/request/service-types
MCP [submit_service_request](#)

California Public Records Act us/ca	
Initial response	10 days
Extension	14 days
Fees, exemptions, appeals	on record

UnGovr Records Live

Open-records law as structured data, plus the machinery to file requests at scale and read what comes back.

398 records laws, 140+ countries
2,200+ agencies asked

UI law.ungovr.org/records
API data.ungovr.org/v1/laws/records
MCP [get_open_records_law](#)

UnGovr Meeting Pilot

Recordings of public meetings become searchable transcripts, with each official's words attributed by name.

4,300+ hours transcribed
1,000+ meetings

Use our interfaces, or build your own.

Most partners will build these capabilities into their own products. Ours show what is possible.

For people ungovr.org
Every mapped government, in an accessible, multilingual interface

For software data.ungovr.org/v1
REST API and bulk downloads, mostly open under CC BY 4.0

For AI agents mcp.ungovr.org/mcp
Model Context Protocol server, in the official MCP Registry
